Dear Hiring Manager,

I am writing to express my interest in Software Engineer opportunities suited to a fresher profile. I recently graduated with a B.Tech in Computer Science (CGPA 8.1) from PSG Institute of Technology and Applied Research, with hands-on experience in backend and full-stack development using Java, Spring Boot, Python, and REST APIs.

During my degree, I built three end-to-end applications — an infrastructure monitoring platform, an NFC-powered commerce app, and a digital token system — each involving REST API design, authentication, and database integration, with measurable improvements in performance and efficiency. Details of these projects, along with a two-month web development internship at Forest College and Research Institute, are outlined in my attached resume.

Beyond technical work, I served as Placement Coordinator for my batch, organized a Spring Boot workshop for peers, and earned recognition at two project expos — experiences that reflect my initiative and ability to work well in teams.

I am proficient in Java, Python, Spring Boot, Django, React Native, and Flutter, with working knowledge of SQL, API testing, and cloud computing fundamentals. I would welcome the opportunity to bring these skills to your team and am happy to discuss my fit further in an interview.

Thank you for your time and consideration.

Sincerely,

Srinith P
